- Vercel

PROJECTS

BoxCricker – UI/UX Design Project [\(Source\)](#)

Designed a complete UI/UX experience for BoxCricker, including both User Panel and Admin Panel interfaces. Created all application screens, user flows, wireframes, and interactive layouts with a focus on usability, accessibility, and modern design principles. The project included dashboard screens, user management, authentication flows, analytics pages, settings panels, and responsive mobile-friendly designs to ensure a seamless user experience across devices.

Empella Exports – Inventory Management System (UI/UX Design) [\(Source\)](#)

Designed a complete Admin Dashboard and Inventory Management System for Empella Exports. Created end-to-end UI/UX designs for Dashboard, Check List Management, Vessel Schedule Tracking, Company Management, Product Master, Category Master, User Profile & Settings, and Daily News Management. Focused on designing intuitive workflows, data management interfaces, enterprise dashboards, and responsive user experiences to streamline business operations and improve productivity.

MomentRoom – AI-Powered Auto Reel Creation Mobile Application [\(Source\)](#)

Designed a mobile application that automatically transforms short video clips into professionally edited reels. Created complete UI/UX designs for clip uploads, group-based memory organization, automatic reel generation, media management, sharing features, and user profiles, delivering a simple and engaging content creation experience.

HostelHub – Smart Hostel Management System [\(Source\)](#)

Designed a complete mobile application for hostel residents and administrators to streamline hostel operations and communication. Created end-to-end UI/UX designs for room management, visitor approvals, payments, complaints, event management, notices, facility booking, meal schedules, attendance tracking, emergency support, and hostel announcements. Focused on creating an intuitive, user-friendly, and modern experience that simplifies daily hostel activities for students and administrators.

ACHIEVEMENTS

Secured First Place in the College-Level C Programming Competition, demonstrating exceptional programming, analytical, and problem-solving abilities. Recognized for outstanding technical performance and awarded a cash prize of ₹15,000.
